96" RAW WATER MAIN, MEDLEY, FLORIDA

On Friday, October 20th, at approximately 3 PM; MDWASD contacted its Emergency Response Teams to visit and submit an emergency proposal to remove and replace a 96" Raw Water Main, which had been damaged by Horizontal Directional Drill. The Emergency Response Team is a select few in a pool of prequalified general contractors capable to immediately respond with heavy equipment and experienced manpower. A proposal was submitted at 8 PM. Lanzo Construction Co. of Florida was selected to perform the project.

On Saturday, Lanzo crews were on site at 7 AM, working and coordinating with MDWASD inspectors to begin the removal of the damaged pipe. While equipment and crews were being mobilized to the site, an exploratory excavation was being performed, and a crew was at the MDWASD storage yard loading the 96" repair materials and transporting them to the job site.

The existing pipe was cut and dewatered. The crews secured and dewatered the trench, continuously working 24 hours a day until the damaged pipe was removed & replaced (within 72 hrs).

The damaged pipe was delivered to MDWASD for damage analysis.

The crews, led by General Superintendent, Joe D'Alessandro Jr., and Crew Foremen, Paul Sadro and Paul Wieczorek, demonstrated why Lanzo Construction is the industry leader. Lanzo finished the work well within the timeframe demanded by MDWASD.

SUNSET HARBOUR IN THE SPOTLIGHT

Sunset Harbour was in the spot light due to the intense rain storms that took place in August. An e-mail was received from the Public Works Department of Miami Beach acknowledging Lanzo's work.

"Daniel, your quick work yesterday was very much appreciated. I am certain we are better able to handle sudden rain events by lowering the weir wall. Please share the city's sincere appreciation with your team, working in the rain was stressful and challenging on them. It is helpful knowing the city is able to depend on Lanzo Construction in these short notice situations. Best Regards" – Roy Coley, Assistant Department Director/Infrastructure Director/Public Works Department, City of Miami Beach.

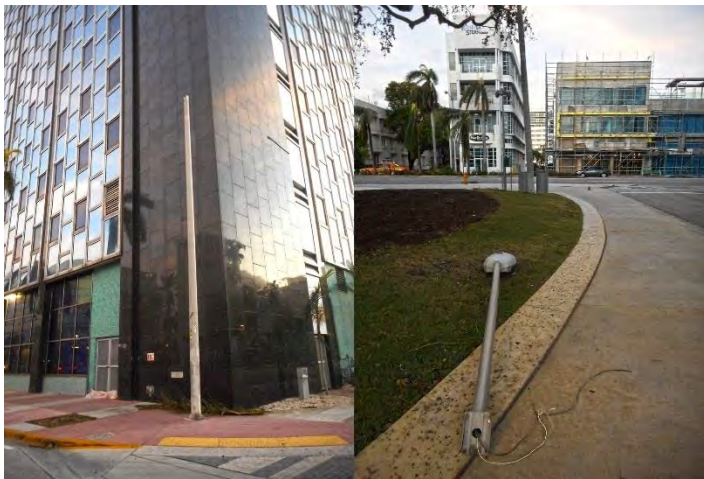

Lanzo also received **ENR Southeast's 2017 Best Projects Award**. The *Water/Environment Best Project* was awarded for the Sunset Harbour Neighborhood Improvements Project in Miami Beach. In addition, ENR Southeast also awarded the Sunset Harbour Neighborhood Improvements Project in Miami Beach with the *Award of Merit for Safety*. ENR Southeast will provide readers with more information in their November print edition.

Thanks, and good job to Daniel Mesquita, JC Echavarria and all those whose hard work, ability and skill enabled the spot light to shine favorably on Lanzo on the Sunset Harbour Neighborhood Improvements Project.

HURRICANE IRMA

Hurricane Irma developed on August 30, 2017. She rapidly intensified shortly after formation. By September 5, Irma became a Category 5 hurricane. Her peak intensity was 185 mph making it the 2nd most intense tropical cyclone worldwide so far in 2017, behind only Hurricane Maria. Irma made landfall in Cuba as a Category 5.

Washington Ave and Lincoln Lane, Miami Beach

Drexel and 15th Street, Miami Beach

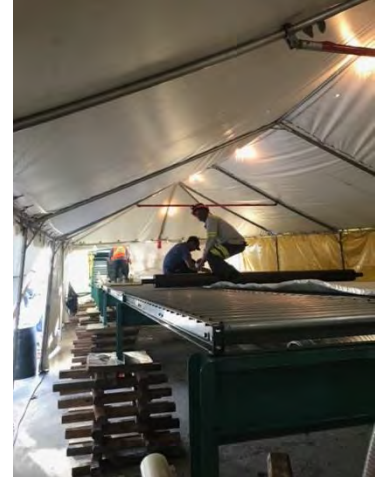

In the morning hours of September 10, 2017 Irma made a US mainland landfall on Cudjoe Key as a Category 4 hurricane and then made a 2nd Florida landfall on Marco Island as a Category 3 in the late afternoon. She continued barreling through the State of Florida and weakening into a depression over the Georgia-Alabama border. By 1pm on September 10 there were almost 730,000 customers without power in Miami-Dade County alone. By the end of the day over 2.6 million homes in Florida were without power.

Lanzo would like to thank all Superintendents, Project Managers, Engineers, Foreman, Field Crews as well as in-house staff who helped with the preparations prior to the hurricane impact and the extensive clean-up that was required once the storm had passed.

Special thanks is given to Casey Gore for her hard work and dedication in getting the payroll posted during the two weeks the schedules were turned upside down by shut down, lack of power and the internet.

BOBBY BUCCI PRODUCTIONS PRESENTS CITY OF WEST PALM BEACH 48" CIPP PRESSURE PIPE INSTALLATION

In October 2017, Lanzo took the opportunity to extend invitations to visit our current lining project in West Palm Beach to demonstrate the installation of a 7,000 lineal foot Pressure Pipe CIPP project. All major municipalities and key consulting engineering accounts throughout Miami-Dade, Broward and Palm Beach Counties were invited. The jobsite visits were very well attended with Pablo Riano, Sal D'Alessandro, Jorge Valdes, John Williamson and Fred Tingberg very instrumental in making the guests feel comfortable during the technical exchange.

This visit gave them the opportunity to witness one of the phases of our “over the Hole” CIPP Pressure Pipe installation where we are conducting a field impregnation and inversion of a 48” Resin Impregnated tube.

We arranged a location to gather and then we transported all guests to our Welcome Tent and introduced them to the job scope, drawings and representative samples. They then exited the tent directly to where the Wet Out, Inversion Lining, End Seal, Pressure Testing and or closure assembly procedures were taking place.

AMERICAN SOCIETY OF CIVIL ENGINEERS (ASCE)

On Thursday, August 24, 2017 the ASCE held their annual Miami-Dade Annual Awards and Installation Dinner.

This event recognizes excellence in Civil Engineering throughout Miami-Dade and Monroe Counties. They highlight the efforts and accomplishments of this year’s award winners, scholarship recipients, life members as well as their Board of Directors.

Lanzo was recognized as a Gold Sponsor of this event.

As you can see to the right the Lanzo contingent consisted of Joe D, Fred Tingberg, Joe Jr., Sal D'Alessandro, Pablo Riano, Michael Green, Daniel Mesquita and Jorge Valdes.

**ASCE 2017
ANNUAL BOWL-A-THON**

The American Society of Civil Engineers (ASCE) held their 2017 Annual Broward Bowl-A-Thon on Saturday, August 5, 2017.

Lanzo sponsored a team. Team members were, Pablo Riano, Victor Riano, Reno D'Alessandro, Tim Mulligan, Neil Stevenson, Clifford (Dale) Hime, Kenny Herron and Kevin Muto. A good time was had by all.

NEW ARRIVAL

*Alejandro & Tatiana Godinez
Announce the birth of their daughter
Ava Isabella Godinez
born*

*Saturday, October 28, 2017
Congratulations Tatiana & Alejandro!!
Welcome Ava Isabella!!!*
